

512-10 AQUA BORNE ALUMINUM

This high quality water borne metalized aluminum is an ideal coating for interior and exterior wood or metal surfaces where a silver metallic appearance is desired.

USES: A finish coat for interior and exterior items of wood, metal, masonry, plaster and many vinyl and plastic surfaces. Excellent for machinery, pump, motors, fences, roofs, pipes and ducts.

MATERIAL PREPARATION: Stir contents to a uniform consistency and stir occasionally during use.

SURFACE PREPARATION: All surfaces must be cleaned of dirt, grease, oil and wax. New metal should be washed with solvent. Rust scale, loose paint and other foreign deposits should be removed from metal surfaces by sand blasting, wire brushing or scraping.

APPLICATION: Pad recommended. Also brush, roll or spray.

COVERAGE: Up to 1,000 square feet per gallon. 450-500 square feet recommended for most work.
